Seth Godin on Learning & Education

*By Seth
Godin*

How do we teach?

💡 *Authentic learning replaces compliance with enrolment and practical projects.*

- **A Pedagogy of Enrolment:** Learning for the sake of learning.
- Traditional education focuses on compliance and coercion.
- Conforming to requirements serves the test.

The Compliance Model

- **Compliance** ensures conformity across large groups.
- **Standardized testing** provides speed but lacks depth.
- **Extrinsic motivation** fails to produce permanent mastery.

The Enrollment Alternative

Goal Oriented

Enrollment connects learning to specific personal goals.

Voluntary

Voluntary commitment fuels long-term retention.

Interest Driven

Interest-driven education yields faster results.

Information

Modern tools provide infinite data.
Access to experts no longer requires
physical proximity.

Absorption

Authentic learning requires
internalizing concepts through
action.

Common Mistakes & Fixes (I)

THE MISTAKE

✗ Prioritizing the test over the goal.

✗ Confusing data with understanding.

✗ Using coercion to force progress.

THE FIX

✓ Align learning with personal aims.

✓ Apply information to a project.

✓ Find an internal "why."

Common Mistakes & Fixes (II)

THE MISTAKE

✗ Working in isolation.

✗ Avoiding time pressure.

✗ Focusing on passive consumption.

THE FIX

✓ Engage with peers for feedback.

✓ Set strict deadlines.

✓ Start doing the work.

Common Mistakes & Fixes (III)

THE MISTAKE

✗ Ignoring the belief system.

✗ Waiting for expert permission.

✗ Stopping once testing ends.

THE FIX

✓ Connect lessons to values.

✓ Use an open door and start.

✓ Continue practicing for mastery.

Homework: Reflection

"Ask yourself, what are you learning for the sake of learning?"

- Identify one topic you learned for a test and promptly forgot.
- Share a time when you learned a skill faster because you cared about the outcome.
- How would you describe your current enrollment in your projects?
